Accepted Historical Synthetic Parent Qualification
maximum plane-wave separability ratio: 6.466e-04
Qualified parent metrics
coefficient Hermiticity
coefficient inversion
represented Hermiticity
uniform/seam bridge
isotropic (0.5, 0.5)
anisotropic (0.3, 0.7)
axis-swapped (0.7, 0.3)
Frozen perturbation metrics
represented Hermiticity
uniform/seam bridge
directional nearest-neighbor
finite-range diagonal
