
Post-hoc τ_1–τ_2 feasibility map: maximum losses
proper native Wigner–Seitz shell reductions only
requirements of each proper reduced shell
minimum retained support witness
required maximum operator threshold
required maximum spectral threshold
post-hoc operator threshold, τ_2
post-hoc spectral threshold, τ_1
minimum included Wigner–Seitz representatives
gray: no proper reduced shell satisfies both
H17 full-support control = (0,0), excluded from feasibility
