
Post-hoc τ_1–τ_2 feasibility map: maximum losses
proper native Wigner–Seitz shell reductions only
producer-checked development; not independently verified
requirements of each proper reduced shell
minimum retained support witness
required maximum operator threshold
required maximum spectral threshold
H00
H14
H16
H∞ full-support control = (0,0), excluded from feasibility
gray: no proper reduced shell satisfies both
post-hoc operator threshold, τ_2
post-hoc spectral threshold, τ_1
minimum included Wigner–Seitz representatives
